

Independent living at home

There comes a point in our lives when we need a little bit of extra support in order to continue to live independently.

1. Keys

A Key holding service is available for all Careline customers.

Entrance

2. Exit Monitor

This monitors the use of entrance / exit doors and lets Careline know if someone has left the property inappropriately.

3. Door Chains

A completely new style of door chain, designed to be released from the outside using a lock and key.

4. Wireless Door Chime Intercom

This portable handset chime allows you to have a two way conversation with a caller when they ring your bell.

5. Bogus Caller button

Press to alert Careline that you have a bogus caller at your door.

Hallway

6. Smoke detector

This alarm is provided in partnership with West Sussex Fire and Rescue.

7. Movement Detector

Useful for monitoring both activity and inactivity in your home, making sure that you haven't had a fall and you are able to move around your home as normal.

Kitchen

8. Natural gas detector

Warns of dangerous levels of gas in your home.

9. Extreme temperature detector

Reports to Careline if there has been a sudden change in temperature, guarding against hypothermia or overheating.

Bathroom

10. Flood detector

Will warn Careline if taps are left on or pipes are leaking in the kitchen, bathroom or loft.

11. Fall Detector

Automatically alerts Careline if you have fallen to the ground.

12. Mindme locator

The Mindme locator is designed especially for those with dementia. The device is waterproof and looks like a key fob. It can be placed in your bag, pocket, or can even be attached to your house keys. There are no buttons or flashing lights and the GPS locator identifies your location every three minutes. This means if family members are concerned, they are able to access a secure website where they can locate you. Alternatively, they can call through to our 24/7 centre for assistance.

Bedroom

13. Bed occupancy detector

This will alert Careline if you do not get back into bed after an agreed period of time... and it can even turn your bedside light on and off when you get in or out of bed.

14. Automatic Light Switch

As soon as your feet touch the ground, this sensor will switch on the lights for a pre-set amount of time.

Lounge

15. Careline Unit

The intelligent hub at the heart of your home.

16. Personal Pendant

Summon help at the touch of a button within your home environment with your waterproof Careline alarm pendant which can be worn around your neck or wrist.

17. Medication Dispenser

Reminds you when to take your pills or medicine.

18. Chair monitor alert

Alerts Careline, if you do not return to your chair within a set period of time.

19. Carbon monoxide detector

Provides advanced warning of CO build-up from gas fires.

20. Remote Light Switch

Allows you to switch lights and appliances 'off' and 'on' from the comfort of your armchair (or bed).

21. Mobile Warden

Our specialist staff are available 24 hours a day to visit you at home when you need help.

22. Mindme alarm

If you're feeling unwell, just press the button on your Mindme device and we will get help to you straight away. The device is waterproof and looks like a key fob. It can be placed in your bag, pocket, or can even be attached to your house keys. The GPS locator can tell us where you are and the button means that you can talk directly to us. You can also give your family access to a secure website where they can locate you if they're worried.
